

Forest Fires Held in Check in York and Star Creek Districts

Splendid Co-Operation of Fire-Fighting Crews Aided in Plans of Forestry Officials. Shifting Winds Added To Difficulties. Fires Burning for Nine Days

Friday, Saturday and Sunday were trying days on the firelines at York Creek, Star Creek and Glacier Creek. It was men's work combating the onrushes of the sheets of flame, the wind at times assuming cyclonic velocity in the rock bound canyons of York Creek, forcing men to retreat from the scorching heat and stifling smoke.

While the air was calm, rapid progress was made in establishing fire lines, by cutting out trees and digging up the scanty earth, but each afternoon as the wind increased the work of many hours of hard labor would be swept over by the fiery advance which was impossible to check.

Supervisor Alexander and Ranger Boulton worked day and night in keeping the campaign organized, snatching an hour or two of sleep when things calmed down. The majority of the men from all Pass towns worked splendidly for long hours.

Base camps for feeding the men were established at safe distances from the fire fronts, where cooks and helpers were steadily employed in preparing breakfast and supper and also the lunches which are sent up to the lines during the day and night. So heavy a call was made on local stores that supplies had to be secured from Lethbridge and Fernie. "On Sunday over 250 men were employed, Bellevue and Hiltner supplying over 60, and a number of transients came in to help the local crews.

Yesterday afternoon Star Creek fire caused some apprehension in town as the usual afternoon wind fanned it.

Saturday and Sunday were the peak days of the battle. Over 300 men were at work in the various sectors, and on Saturday night at 10 p.m. over 60 men were brought in from Bellevue and Hiltner, sleeping at International power house till 4 a.m., when they were breakfasted in town and moved to York Creek ready to fight fire at 5 a.m.

The fires started here on Tuesday Aug. 25, and it is worthy of note that they have been kept well in hand instead of running wild, as in British Columbia, where the forestry service has been under severe public criticism.

Special Labor Day Message

At St. Paul's United church on Sunday at 11 a.m. the minister, Rev. A. E. Larke, will preach a Labor Day sermon.

At 7 p.m. the service will be in charge of Mrs. Larke.

The junior choir will meet for practice at 6.30 p.m. on Friday, Sept. 4th.

The Sunday school will hold a basket picnic on Monday afternoon at 2 o'clock in the park. Parents are asked to bring baskets and gather together to make this a real success for the boys and girls.

The senior choir will meet for practice on Friday, Sept. 11th at 8 o'clock.

Rod and Gun Club

The club will hold their final competition for the season on Sunday, Sept. 6, at North Fork. Names to be handed in to A. Phillips. Cars leave at 6.30 a.m.

Attend Bellevue exhibition and sports day on Monday.

Around the Camps

Two bears were seen by Star Creek fire fighters, evidently chased out of their usual haunts by the fire.

Whilst surveying the burned-over area on Sunday, from a point of vantage on a big rock, Ranger Boulton was as surprised as a rabbit was frightened when it scampered from beneath the rock. It had taken refuge from the heat, and it is a wonder that it survived. Quite a number of rabbits singed by fire besides little groups of dead ones were seen in the burned over areas.

Supervisor Alexander, while on an inspection tour beyond York creek, came across a partridge sitting on a burned stump, as if it were wondering which was the safest place to go.

Charlie Robinson, cook at Star Creek camp, was pouring some of his reminiscences into the ear of "ye editor" while out there one evening having "a cup o' paw fee." The conversation was about camps he had cooked for. "This is just a blanket fly camp for me," said Charlie. "Why I cooked up in Rogers Pass for 1200 men in the C. P. camps and at one time during the war I cooked for 2400."

This recalls to mind the late George Ritchie, forest ranger for many years at South Fork. He became engaged in a discussion with an old woodsman named La Coste, as to the accuracy with which experienced ax-men could hew. "Well," drawled old George, "the best ax-man I knowed could take a piece of printed paper and tack it on a tree, and he could hew so true he just hewed that print clean off the paper."

To which LaCoste replied that back east the length of time a foreman would hold his job in a logging camp would depend on how good a story he told. "Mr. Reetchee," he said, "sometimes a man stay a month; sometimes three months, and maybe sometimes a year; but—Mr. Reetchee—I think you could hold that job for ever."

Coleman Schools Staffs

High school—David Hoyle, M. Sc., (Mathematics and Science) Miss B. L. Dunlop, B.A., (English and History) Miss May Powell, B.A., (French and Latin). Miss Dunlop is an honor graduate of Saskatchewan university, and Miss Powell is an honor graduate of Alberta university. They are graduates also of Alberta University School of Education.

Central (public) school—Miss V. McDonald, Miss O. Hole, Mr. J. Cousins, Miss E. Wilson, temporary teacher, Miss E. Fairhurst, Miss K. Milley, Miss H. Clifford, Mrs. M. Clifford.

Cameron school—Miss M. Yuill, Miss Margaret Dunlop, Miss Ethel Dunlop, Miss Laura Johnston. High school enrolment 94, Central school 400, Cameron school 120.

Beautiful photographs of Crow's Nest district scenery in natural colors, on sale at McBurney's, make splendid presents to send to distant relatives or friends, or for your own home.

Antrobus-Simmons Wedding

Rev. Fred Antrobus, B.A., old est son of Mr. and Mrs. Wm. Antrobus, of Coleman, and Miss Margaret Ida Simmons, B.A., daughter of Rev. and Mrs. George N. Simmons, of Cobourg, Ont., were married on Monday, Aug. 31, in St. Paul's church, Rev. A. E. Larke officiating.

The bride, prettily attired in white silk and carrying the conventional bouquet of roses, was given away by Mr. John Houghton, and the matron of honor was Mrs. Wm. Dewar. Freda Antrobus was flower girl, carrying a pretty basket of smilax and fern and sweet peas. As the bridal party entered the church, Mendelssohn's Wedding March was played by Mr. J. Emmerson. During the signing of the register, Mrs. J. Asbridge sang "O Promise Me."

Following the ceremony, immediate relatives and friends met at the home of Mr. and Mrs. Wm. Antrobus for the wedding banquet, where the usual toasts were honored and the wedding cake cut.

The bridegroom is well known here, having gone from high school to Alberta university, and later to McMaster, where he was graduated with high honors. The bride also is a graduate of McMaster university, Toronto.

They will reside in the town of Peace River, where Mr. Antrobus is pastor of the Baptist church.

Masons Invited to Kimberley

Selkirk Lodge, A. F. & A. M., Kimberley, B. C., has extended an invitation to lodges of the Crow's Nest Pass towns to visit them on Saturday, Sept. 19, when Sentinel Lodge of Hiltner will exemplify the degree. It is probable that quite a number of the Masonic fraternity will attend, as this is the first time in many years that a gathering of this nature has been held in the smelter town, and many are desirous of visiting the lodge there. All members of Summit Lodge who desire to go should attend the meeting this evening or notify the secretary, M. W. Cooke.

Crescent Lodge L.O.B.A. 599 Coleman

The officers and members of the above lodge spent a very pleasant evening on Aug. 21, at the home of Mrs. J. Richards.

The gathering was in compliment to Mrs. Jas. Scott who will soon be leaving Coleman, after residing here for 23 years.

The members of the L. O. B. A., who are very sorry to part with Mrs. Scott, presented her with a gold brooch, the badge of the L. O. B. A.

The presentation was made by the Worthy Mistress, Mrs. Neil McKinnon, and Mrs. Scott suitably responded.

Michalsky's Store Robbed

Police to-day are investigating the breaking into of Coleman Trading Co. During Wednesday night burglars broke open doors at the rear of the store, and stole cigarettes, canned goods, and various other articles.

ST. ALBAN'S CHURCH

Next Sunday, the 14th. after Trinity, the services will be: 8 a.m. Holy Communion. 9.30 a.m. Sunday School. 7 p.m. Evensong and Service.

Leslett's store offers some exceptionally good specials which are listed in the store windows. Make it a point to look them over—it will pay you!

Leslie Emmerson Injured

Leslie Emmerson was injured in an automobile collision on Saturday night near Coalhurst. He was driving his father's car, and with him was a young man employed in the bank at Bellevue, and a young lady. They intended to bring a Mrs. Nelson back to Lundbreck. A car approached them, steering an erratic course, and collided head on. The two occupants of the other car were reported to be under the influence of liquor, and were placed under arrest. The injuries to the occupants of Emmerson's car included a broken arm, sustained by the bank clerk; the young lady badly bruised, and Leslie Emmerson injured to his neck and badly bruised.

He Met the King

Chief John Houghton was at Banff highland gathering, and among other notables met the king and queen of Siam, quite informally. It was as they were coming out of the government vendor's store, where, with members of their suite, the king had evidently been arranging for the supply of liquid refreshments to be delivered for next day's fishing trip. The king went to his car, the queen went to her car, and the incident passed off without any fuss or feathers; just the same as when the ordinary individual drops in and buys the odd crock. The only difference is that the king bought a lot of crocks.

A Tale Untold—Till Now!

Here is an interesting incident of a local man who told a newspaper publisher that it did not pay him to advertise. The publisher, following this turn down, published an advertisement from a Calgary house which made a specialty of including week-end specials in its particular line. Express parcels arrived by the score each week that the advertising continued, and the local man who had formerly said "It does not pay to advertise" put up the loudest squeal when he found it paid somebody else. And this actually happened in Coleman, but the man who said "It did not pay to advertise" is no longer in business here.

Comfort on Railways

Between Regina and Weyburn Sask., the C.N.R. is putting on an electrically driven car. This should prove more popular on short runs than the motor bus, for one will escape the dust and glare of the highways.

Andy Oliva was visiting friends in the Pass towns this week. Considerable relief work is being provided in Calgary, and despite unemployment, there is considerable activity, he states.

EXPLANATION

I hereby state that any statements made by me concerning Walter Badisch were untrue. I absolutely withdraw same, and am sorry that such were made.—Stanley Tarabala.

Coleman Public Schools

Pupils will be admitted to the Primary Grades of Central and West Coleman public schools who are not less than six years of age on Nov. 1, 1931.

Birth certificates or other satisfactory evidence must be produced at time of registration. D. Hoyle, Principal.

Develop customer contact among the buying public of Coleman by having an interesting advt. each week in The Journal. It's the most efficient medium for keeping the people advised of store news of interest. Advertisements constitute store news, and are eagerly read.

The public sense is quick to appreciate service, which means high quality at the lowest price commensurate with value received. To supply inferior goods even at a cheap price ruins the reputation of a store. Once confidence in a store is lost, business will keep slipping.

NOTES AND COMMENTS

Business men must be leaders in their communities if they are to retain the confidence and goodwill of the people whom they desire to do business with. They must set the example of energy, confidence and optimism. Energy, courage and a cheerful outlook are contagious. People are attracted to men of action. There is a whole lot of unseen power in personal magnetism. Size up the men of your own acquaintance, and you will find that no two are alike.

You cannot but help admire the man who goes down to defeat with flying colors, fighting with every ounce of energy to keep going. If he goes under, against overwhelming odds, he still retains the admiration of the people.

But the fellow who is always going more than half way to meet trouble, whose mental attitude is inclined to make him recede from tackling new tasks and to "draw in his horns," often become stampeded by his own fears or his energy is quenched by a pessimistic outlook. He usually meets with the fate he has contemplated. Vice versa, the fellow having the outlook which envisions a future of brighter things and works unceasingly towards it, has his battle more than half won.

There are as good opportunities to do business in the Crows Nest Pass towns as anywhere. But persistent work and the use of one's mental powers are necessary to take advantage of the business opportunities which approximately 10,000 people in this group of towns offer. A man who says there is no chance of doing business can be likened to the fellow who saw only the hole in the doughnut, or the fellow who asked another pessimist—"What's the use of anything?" to which the second party replied—"Why, nuffink!" That is just the attitude of many who wonder why they do not enjoy some of the finer things of life, who groan in self pity because things are as they are.

One has to hand it to the people of Regina. Despite efforts that are being made to postpone or cancel the World's Grain Show in 1932, the various organizations there are against it. Their enthusiasm is not to be killed by conditions, and their enterprise under such adversity is worthy of emulation. No thought of "cold feet" about those people.

War on forest fires, as in other wars, in which a call is made on the man power of the country to fight a common foe, causes interesting reflections. You see men willing to contribute their share in the work, regardless of the scant pay. Others hang back and dodge the police or fire rangers. The whole country could burn up for all they care. But close observance of the campaign in Coleman district shows that the great majority will do their part, and under leaders in whom they have confidence will stick long hours at a very trying task which at times has its perils. Loyalty and comradeship are just as evident in the fire lines as it was in the trenches.

No matter how pleasant summer holidays may have been, the resumption of the regular routine, the clang of the school bell and the hurrying of children and the anxiety of those going for the first time are welcome sights. It tells us that summer holidays are really over; that we must apply a little more pressure, work a little harder and prepare for the next great festival of the year—Christmas!

The King and Queen of Siam have departed. Many in Canada saw them, close up and at a distance. Though they were honored in conventional style, no flowery or flattering speeches were recorded. At Banff highland gathering the king was heralded to officially open the big show. Lieut.-Gov. Walsh did the talking, the Siamese king pulled the flag to the top of the pole, handed the rope to an attendant, and his part in the proceedings was over. Possibly he does not believe in wasting words. He was educated at Oxford, and what he saw and heard of the average Briton's opinion of others may have prompted him never to talk to public gatherings unless circumstances absolutely demanded it. He's wise at that!

Bellevue Bakery's Remarkable Development**A Practical Demonstration of Industry and Enterprise in Supplying Our Daily Bread**

5,000 sacks of flour, nearly half a million pounds, besides what is used in cakes and pastry, is "some business" in baking. \$12,000 in machinery and ovens, besides investment in trucks and sundry equipment, included in which is a bread wrapping machine costing \$2,000, and the steady employment of from 12 to 15 people; these are factors worth taking notice of in the development of a business which from a one-man concern in 1928 has been developed by energy, foresight and determination to its present proportions.

From its local business in Bellevue, it has extended into Waterton Lakes, Pincher Creek, all the Pass towns west to Natal and Michel.

It is a clear-cut demonstration of the vision of a business man who saw opportunities and made the most of them whilst others looked on, wondering how it is done.

Such is the record of Harry Meade, proprietor of Bellevue Bakery, whose motor vans bearing the slogan "Mother's Bread" are a familiar sight on the highways of southwestern Alberta.

"Our bread is baked during the night, so that distribution commences at 7 a. m. throughout the year to all the towns we serve," stated Mr. Meade in an interview with The Journal. "Our product has to be of uniform quality, or it does not leave the premises, and absolute cleanliness is insisted on, so that no matter when visitors drop into our premises, they will be welcomed without the least hesitancy."

500 loaves at each mixing, baked in Brantford ovens fired with Michel coke, which is more efficient than coal for the purpose, and from 2500 to 3,000 loaves a day is the present output even under comparatively quiet conditions. Wrapped at the rate of 1200 per hour, for people demand wrapped bread, necessitating 10,000 lbs. of wrappers per year, are interesting features of this model bakery.

This business did not just grow of its own accord. It required hard work, and persistent effort must be maintained, stated Mr. Meade, for as a locomotive will soon stop if the steam is allowed to die down, so would the bakery business if constant vigilance is not maintained to keep up the quality and service to the several thousands of bread buyers served by Bellevue Bakery.

500 sheets of bond writing paper letter size may be purchased at The Journal office, price \$1.15, or \$2.15 for 1,000 sheets.

Constant Vigilance Of British Authorities Is Necessary To Suppress Slave Trade In Africa

Those comfortable people who are wont to accept as gospel the glittering generalities of opportunist orators and who, therefore, believe that all is well with the world apart from depression and failure to agree upon disarmament and war debts, may get something of a jolt if they peruse the reports of the recent annual meeting of the Anti-Slavery Society. They have been accustomed to believe that slavery was abolished in all countries with the exception of Liberia. But no less an authority than Mr. J. A. Spender tells us that the menace of slavery is ever-present and that nothing but the constant vigilance and the restraining influence of British rule in the Sudan prevent its revival.

Only a year and a half ago there was a round-up throughout the Sudan by the British, which resulted in the rescue of a number of slaves, the capture of some notorious slave-traders and a further grip by the authorities upon the narrowing channels through which these had been operating. But, as Mr. Spender points out, such round-ups are very expensive, and the Sudan treasury is in no state to stand any strain just now. That in a country as large as Europe slavery should have been virtually wiped out in thirty years had been a magnificent tribute to the humanizing and civilizing influences of British rule; but there still remains all over the country a sort of subconscious acceptance of slavery that may not be wholly eliminated for generations. Primitive people are always dwelling across the Sudan, and they all have in this conception of slavery in their traditions and in their blood.

Even today comparatively few of the Sudanese or the Arabs regard slavery as a crime or an offence, but rather as something that has been operating, but there still remains all over the country a sort of subconscious acceptance of slavery that may not be wholly eliminated for generations. Primitive people are always dwelling across the Sudan, and they all have in this conception of slavery in their traditions and in their blood.

Want Lighter Bales

Popular Demand Is For Baled Hay That Is Easily Handled

The Seed Branch of the Dominion Department of Agriculture have received complaints from hay dealers that the present practice by Canadian farmers of putting up hay in bales to weights of 150 pounds or more is killing the market for baled hay. Popular demand today is for a light bale that can be easily handled by the buyer, who in most cases is a carter or truckman, who has to carry the bale on his shoulder to his feed lot. Bales weighing from 110 to 120 pounds will find a much more ready market than heavier bales.

Say It With Advertising

Speaking at a gathering in Montreal L. J. McKenna, member of a well-known florist firm said that advertising was "the lever by which many businesses had been raised to success." He is absolutely right in that statement as to "Say it with advertising" is quite as potent as to "Say it with flowers."

Cop—Hey, there, don't jam up traffic. Why don't you use your noodle?

Sweet Young Thing—I didn't know the car had one.

"And how are your two sons getting on?"

"Fine."

"In spite of the trade depression?"

"Yes, one's an official receiver and the other's a bailiff."—Brunner, Berlin.

W. N. U. 1905

Honor Indian Hero

Meshkioh, Ojibway Brave and Indian guide attached to the French River Bungalow Camp, is as modest as he is courageous. It is three years since, with heavy odds against him, he rescued Miss Elfrida Osman and Dr. J. Schwartz, of Chicago, from the eddies of the Blue Rapids on the French River into which they had been flung from an overturned canoe. He told not the story of his exploit which came at last to the notice of the Royal Canadian Mounted Police. Enquiries were set on foot, the facts came to light and the subject was the presentation to Meshkioh this month at the French River Camp of the bronze medal for bravery of the Indian Agent at a gathering of 120 guests of the camp headed by Manager Jack Strathdee, at which the Chiefs of the tribe in full regalia of feather headdress and richly embroidered coats participated. Meshkioh (left, bareheaded), is shown in the photograph with the medal which is being examined by an Ojibway Chief.

Ten Year Plan For China

Would Convert China Into One Of The Great Industrial Powers Of The World

A "ten-year" plan for China, intended to accomplish much of what the Five-Year Plan is accomplishing for Russia, has been worked out by the Ministry of Industry.

The plan is intended to convert China into one of the great industrial powers of the world. The program has been submitted to the government. It embraces 14 points.

The scheme is of unprecedented magnitude and importance. If accepted in the form proposed, and if successfully carried out, the economic position of China will undergo a tremendous change.

The plan is presented by the Ministry of Industries is worked out in great detail.

That the scheme is ambitious is admitted; that it will encounter many difficulties is fully realized, but that the government can carry this plan through is confidently believed if it can win and hold the people's confidence.

Ontario Grapes

Growers Market Council To Launch Selling Campaign

Designed to promote sales of Ontario's grape crop, unusually large this year, a comprehensive selling and advertising campaign will be launched, according to Charles W. Bauer, secretary of the Ontario growers market council. "Every basket of grapes shipped outside the province will be subject to government inspection to ensure grade and quality," said Mr. Bauer. Ontario grapes would be available all over Canada, he said.

Water makes up 50 to 90 per cent. of growing plants.

Expect Good Crops Next Year

Conditions Favourable For 1932 Crop In Dried Out Areas

"With favourable moisture conditions it is quite possible that an exceptionally good crop may be grown next year in the districts badly dried out this year," says Dr. L. H. Kirk, who recently inspected parts of the dried out areas of Saskatchewan, in company with Hon. Robert Weir, Federal Minister of Agriculture, and J. G. Taggart, head of Swift Current Experimental Farm.

The general appearance of the dried out districts of the south of Saskatchewan is considerably improved, says Dr. Kirk, as a green carpet of Russian thistle covers the land. This is especially true of the better soil types.

As the land has been free from vegetation during the most of the summer there will be some additional subsoil plant food in the soil which will be an additional advantage to the crop. The Russian thistle will hold any snow well and so give the moisture for germination.

The method for the farmer to follow in most places will be to burn off the Russian thistle in spring and seed the land which can be cheaply prepared by some form of surface cultivation without plowing.

There are limited areas so badly drifted that the thistle has not become established. These are usually the lighter types of soil. A method which will be widely adopted is to seed this land during this month with winter rye in strips across the field. The intervening strips will be seeded next spring with wheat.

France's active and reserve military forces comprise 15.4 per cent of the population.

In New York State one woman in every four now works for wages.

Cramped His Style

A temperance organization in Kansas succeeded in getting a bootlegger in jail. The prisoner berated the leader of the organization for ingratitude. "You folks busted up the greatest temperance movement in this country for years," he said. "I was selling them fellows whiskey that was diluted as high as 75 per cent. and if you had let me alone another month I'd a had 'em drinking pure water."

Sergeant, posting sentry and after giving him instruction—"Now, don't forget, if anything moves you shoot."

Sentry—"Yes, and if anything shoots I move."

Beekkeepers regard Italian bees as superior to the black German bees, because the Italian bees are better workers, swarm less, and are more gentle.

A woman never knows what a man thinks of her, although she thinks she does.

Quick-Witted Aviator: "Forward, March!"—From The Passing Show, London.

Greece Is Now Canada's Second Best Wheat Customer, With Importations Steadily Increasing

Reindeer Farm At Churchill

Herd Of 1,000 Reindeer To Be Shipped North Next Spring

Negotiations are under way between a northern syndicate and an Alaska reindeer company for a herd of 1,000 reindeer to be delivered at Churchill next spring. The reindeer will be brought by boat to Vancouver and will be shipped across the continent to their new home about two miles north of the new bay port of Churchill. The chief business of the syndicate is expected to come from Europe. Reindeers can be shipped alive by the cool bay route to Churchill much cheaper than cattle, and their meat is at a premium on the continent.

Cheap food is provided on the barren lands, the only cost will be three or four Eskimo herders. The rate of increase of these animals makes them among the most profitable stock to raise. The reindeer native to the area around Churchill are inferior to the shipment that will be imported both in hides and size. An attempt is being made to get federal aid for the project.

Good Musical Training

Broadens the Mind

Gives Wider Range Of Usefulness To Young People

Don't let the radio drive away all attempt to teach the boys and girls something of the science of music. One evening about the piano with one musical girl playing real music and one young man singing the songs of real composers is worth a year of radio stuff in education and refinement. If our schools could confine themselves to reading, learning the fundamental rules of arithmetic, spelling and music, our children would be brighter, our churches full of song, our society more substantial and more true. Good training in music means a broadening of the mind. It gives to the fortunate scholar a wider range of usefulness. Even the orator teaches his children how to sing.

Making More Butter

Butter Exports Continue to Show a Decided Increase

As the current year progresses the market report of the Dominion Dairy and Cold Storage Branch makes it increasingly apparent that butter fat is being sent to market in the form of butter to a greater extent this year than for some time past. Receipts at Montreal for butter up to August 1st this year, were 369,827 packages as compared with 342,993 packages the preceding year. Cheese receipts totalled 386,373 boxes for the same period as compared with 452,934 boxes for the preceding year. Butter exports continue to show a decided increase, the total to August 1, 1931, being 76,658 as compared with 2,501 last year for the same period.

For Tourist Traffic

Link Up Highway To Connect Western National Parks

An effort to secure tourist traffic on trips around national parks in western Canada, via Riding Mountain Park in Manitoba to Prince Albert National Park in Saskatchewan; then to Jasper National Park in Alberta, down to Banff, Waterton Lakes, Yellowstone and Glacier, will be made by the Federal Government. According to Hon. Thos. Murphy, all that was necessary before launching such an appeal was to complete a few links in all-weather highways.

Cramped His Style

A temperance organization in Kansas succeeded in getting a bootlegger in jail. The prisoner berated the leader of the organization for ingratitude. "You folks busted up the greatest temperance movement in this country for years," he said. "I was selling them fellows whiskey that was diluted as high as 75 per cent. and if you had let me alone another month I'd a had 'em drinking pure water."

Sergeant, posting sentry and after giving him instruction—"Now, don't forget, if anything moves you shoot."

Sentry—"Yes, and if anything shoots I move."

Beekkeepers regard Italian bees as superior to the black German bees, because the Italian bees are better workers, swarm less, and are more gentle.

A woman never knows what a man thinks of her, although she thinks she does.

Greece today is Canada's second best wheat customer with importations to that country continually on the increase, according to Henri Turcot, Canadian Government Trade Commissioner to Greece and Turkey. Canada's best wheat customer is Great Britain.

In 1926 Mr. Turcot was an instructor of languages at the provincial normal school in Saskatoon, and was assistant trade commissioner in Paris and Milan before going to Athens. He is at present touring the Dominion to gain first hand information on business conditions, and will return to Greece in November.

In an interview Mr. Turcot gave an outline of the conditions that exist in Greece and the opportunity for trade with Canada which is present. The trade commission office in Athens has been opened only for two years.

"The general crisis has unquestionably reacted unfavourably on Greek economy and brought about a depression in commercial and other pursuits," said Mr. Turcot. "But the depression can also be traced to a shortage of crops and to low prices obtainable for the staples of Greek export trade. However, it cannot be said that an actual crisis took place in Greece during 1930, nor that one is taking place this year."

"Taking into account the fall in prices, it is evident that the figures relating to the volume of Canadian exports to Greece showed a decided progress. The progress is attributable to our wheat having been shipped to the Greek market in a quantity never attained previously. Shipments of Canadian wheat to Greece represented, in 1930, a volume of 9,000,000 bushels, or over one-half of Greece's requirements of foreign wheat, against 7,000,000 bushels in 1929. Larger sales are reported this year."

"The other Canadian products sold in the Greek market comprised tinned mackerel, tinned lobster, tinned sardines, dried and smoked fish, flour, tomato sauce, whisky, agricultural implements and machinery, storage batteries, wood-pulp for artificial silk, wallpaper and fute bags."

"To complete the picture of Canadian trade with Greece, I shall add that in 1930, our imports amounted to \$16,000 against \$25,000 in 1929, the balance of trade being therefore, highly favourable to Canada."

To Hurry Relief Measures

Credit Of Province Of Saskatchewan Behind Relief Program

To enable the various projects to be started as soon as possible, the credit of the province of Saskatchewan will be placed behind the whole relief programme, Hon. Howard McConnell stated recently.

This spring prevent any undue delay in the commencement of the relief projects and provision will be made later for having whatever amounts are expended recouped by the Federal Government, he said.

The residents of the province in need of aid enabled to benefit immediately, pending further negotiations with Ottawa concerning the distribution of relief costs.

Rights Or Duties

Perhaps one of the most potent causes of the present discontent is the tendency to lay stress on rights rather than duties. Yet the real problem of humanity probably depends far more on the conception of duty than on the conception of rights.

A case of a man who gave some of his blood to save his child, and at the same time unknowingly transmitted malaria to the child, has been reported.

One-tenth of the harvested hay crop in the United States is lost each year from spontaneous combustion.

"Mary, I could write my name in the dust on this table."

Mary: "What a benefit education is, Ma'am."—Moultique, Charlot.

To Combat Drought Causes

Saskatchewan Seeks Means For Assisting Dried-Out Areas

The Saskatchewan Government has appointed a voluntary commission of six, headed by Hon. J. F. Bryant, K.C., Minister of Public Works, to investigate all contributory causes of drought in the southern portion of the province and to suggest plans for combating such causes. This Commission, described as a "Commission On Conservation and Afforestation," has already taken steps to assemble all pertinent data from the municipalities situated in the drought areas of the province, and as part of its assigned duties is to recommend sites for dams for the conservation of water in the creeks and rivers of the south, the Government proposes to seek Federal aid in the erection of dams at the sites suggested. Personnel of the Commission: Hon. J. F. Bryant, K.C., chairman; Hon. W. C. Budge, Minister of Agriculture; W. D. Cowan, M.P., for Long Lake; Dean MacKenzie, University of Saskatchewan; T. Patrick, M.D., and Lieut.-Col. F. J. O'Leary, Regina.

A complete review of the line of investigation which the Commission will follow is given in the following statement issued by the Chairman, Hon. J. F. Bryant: "The commission on conservation and afforestation intends getting down to business as soon as possible, and in the meantime intend to assemble data, as chairman of the commission, I am today sending out to the secretary of each municipality in the dried-out areas of the province, a questionnaire asking that the council of the municipality co-operate with the commission in supplying the following information as carefully prepared as possible:

1. Name of municipality.
2. Number of farms. Number of abandoned farms, if any.
3. Has there been soil drifting in your municipality, and, if so, to what extent?
4. Number of groves of trees in your municipality.
5. Approximate acreage in trees in the municipality.
6. Number of farms with shelter belts.
7. Number of farms raising fruit trees, and with what results.
8. Number of farmers having dug-outs on their property and whether or not there is any water in same this year. Have they been dry at any time?
9. Number of wells that have gone dry, if any, in the municipality.
10. Number of acres owned by the municipality as a result of tax forefeiture.
11. Is said land suitable for agricultural purposes. If not, would it lend itself to afforestation?
12. The kind of trees most commonly found in the municipality.
13. Are there any lakes, sloughs or large bodies of water in the municipality, and, if so, give the approximate acreage of water surface.
14. Please specify any points in the municipality where by the construction of a small dam as a relief measure water could be advantageously conserved.
15. In making application to Ottawa for relief money, the Government is suggesting that a portion of these moneys be set aside for the construction of dams as a relief measure, and therefore any suggestions as to possible sites for dams will be welcomed and checked over by the engineers so that such action as might be deemed advisable could be taken in the case of the most desirable site mentioned.
16. In the interests of a moisture survey of the dried-out and semi-dried-out areas, steps are being taken to assemble all the data as to the rain fall in these districts since the commencement of the meteorological records by the Department of Agriculture in Saskatchewan. An effort will be made to ascertain whether or not present conditions are due entirely to an act of providence or whether it has been brought about in part by human activities such as cutting down the trees which originally formed a wind break and the draining of water areas and sloughs during the past 35 years in order to cultivate the land. In the spring some of our

areas are veritable rivers, in the summer they are practically dry. "The commission will endeavour to ascertain whether or not by damming this water, and by damming the north Saskatchewan, the south Saskatchewan, Frenchman's Creek, Wood River, Notakan Creek, Swift Current Creek, Wascana Creek, Souris River, Moose Jaw Creek, Pipestone Creek and others, to form a series of lakes of considerable area, if this would be effective in preventing drought conditions.

"At the same time it would be desirable if each farmer in the dried-out area would select a natural basin of water, and to which the surface water drains, and make a dug-out; such dug-out not to be too wide because the water would evaporate with a wide surface, but to be made long and deep, and if later on trees were planted around the dug-out, the trees would catch and hold the snow and eventually the dug-out would produce a permanent supply of water for the farmer and his stock. This would help very materially if there was a drought built during the slack times on every farm in the dried-out area.

"When the first winter was reached the State of Nebraska there was not enough wood to supply the wagon teams. Nebraska was the largest state of trees in the United States and was described on the map as a great American timberland. For 50 years Nebraska has carried on a tree-planting policy. Today there are 2,500,000 trees in Nebraska. As a result the annual rainfall has increased to more than 30 inches, and even the hills produce good crops of wheat and the western part of the state which formerly cultivated nothing at all now grows corn and soybeans. Last year when neighbouring states were dried-out, Nebraska produced a crop worth \$600,000,000.

"Such measures would of course be costly, but when we consider that drought can cost the Province of Saskatchewan a loss of around \$200,000,000 in a single year, we feel that it is worth while to make an effort to find a sound and economical solution of the problem.

"In Saskatchewan we get around \$2,000,000 from our wooded areas under present conditions annually. In Sweden, where the area suitable for tree growing is no greater, under their forestry policy the wooded areas produce nearly \$100,000,000 per annum. I am convinced that under a properly conceived tree-planting policy it is possible to increase the rainfall in southern Saskatchewan very materially; increase agricultural production, and at the same time produce sufficient wealth from the wooded areas to pay off our provincial debt. A systematic and definite forestry and conservation policy under a commission appointed for a term of 10 years at a time, and embracing on a definite plan which would take 65 to 75 years to fully mature, would work marvels in the southern part of Saskatchewan. A 10-year plan would avoid uncertainty and would make the scheme definite. For each 10-year period a definite sum could be sanctioned and amounts required voted yearly by year according to the estimate.

"The Minister of Public Works, in conclusion, stated that he was anxious that all farmers in the dried-out areas should communicate at once with the secretary-treasurer of their municipality, giving information as to the number of acres of water in their land; the fruit orchards, if any, and their success in connection therewith; the number of acres of water on their land; whether there is a dug-out on their land or not. Further, if the well has gone dry, they are requested to report same to the secretary of the municipality.

Montreal Grain Deliveries

Grain deliveries from the Port of Montreal for the season to date topped the fifty million mark on August 4th, the amount shipped being 50,093,867 bushels. This figure compares with 40,260,862 bushels in the corresponding period of last year. Grain receipts at the port had reached the fifty million bushel mark several days earlier.

A filament for a new type of electric lamp is one-fifth the thickness of a hair.

HOW HE FLEW FROM "DOWN UNDER"

The picture above was taken in a London, England, hotel when J. T. Mollison, the young Glasgow aviator, who broke the world's record for the shortest flight from Australia to England by two days, the report being he did it. In order to cover the 10,000 miles in eight days only had two hours' sleep each night, and the picture shows him, very tired, but happy, as Hon. Mr. and Mrs. Victor Bruce in the rear listen to his thrilling tale.

SUNDAY SCHOOL LESSON

SEPTEMBER 6

TURNING TO THE GENTILES

Golden Text: "I have set thee for a light of the Gentiles, that thou shouldst be for salvation unto the uttermost part of the earth."—Acts 13:47.

Lesson: Acts 13:13-52; Romans 1:14-16; 11:13-24.

Devotional Reading: Psalm 72-13.

Explanations and Comments

The Result Of Paul's First Sermon in the Synagogue At Pisidian Antioch, Acts 13:42-44.—After Paul's sermon, he and Barnabas withdrew from the synagogue, while the congregation remained for the end of the service and the formal dismissal. As they left they were urged to speak again the following Sabbath. When the synagogue services were over, many Jews and proselytes (Gentile converts to Judaism), followed Paul and Barnabas to their place of abode and Paul urged them to continue in the grace of God. This is the first use in the Bible of the phrase "Grace of God," i.e., "redemption from sin freely offered in Christ." "Grace" expresses the generous generosity of God's love; God freely grants His pardon and bestows His love in Christ.

As a result of the wide-spread discussion of Paul's sermon and of the work of Paul and Barnabas during the week that followed, "almost the whole city was gathered together to hear the word of God on the next Sabbath. (A different Greek phrase is used in verse 42 for "the next Sabbath," but it means the same.) Some scholars translate it in verse 42 as "during the intervening week." The word "intervening" has a portion of the Law read in the synagogues not only on the Sabbath but on Monday or Tuesday morning, that they might not be for three days without hearing Scripture. The peculiar expression may apply to the meetings in the synagogues on these days."—P. Rawson Lumby.

The preaching of Paul during the week created a tremendous interest. When the Jews saw the multitude they were filled with jealousy. Their antagonism was due primarily, not to opposition to Paul's words, but to envy of his success. It was not loyalty to the Law and the Jews to contradict Paul and to blaspheme.

Turning To The Gentiles, Acts 13:44-46.—The word of God increased, and the number of the disciples in Antioch multiplied. Paul and Barnabas spoke out boldly and said, "It was necessary that we should first be spoken to by you. Seeing ye thrust it from you, and judge yourselves unworthy of eternal life, we have turned to the Gentiles. Forasmuch as the Gentiles have heard the word of God, and have accepted it, and are about to be enlarged their numbers, we have turned to the Gentiles."—P. Rawson Lumby.

Notices the well-guarded balance between the Jewish and the Gentile world, and the chief men of the city, the Roman colonists, the local aristocracy, as Professor Ramsay calls them, who were the high privileged class and held the reins of government. These joined forces with the Jews persecuting Paul and Barnabas till they were driven from the city.

Paul and Barnabas shook off the dust of their feet against them. This was not a childish act nor a sign of contempt or insult, but a symbolic action implying that those to whom it was done were left to go their own way, and that they were to accept heaven, let them retain earth and its dust.

Recall the words of Jesus in Luke 9:5: "And as many as receive you not when ye depart from that city, shake off the dust from your feet for a testimony against them." The Universal Gospel, Romans 1:14-16: "I am a debtor," wrote Paul to the Romans, "both to Greeks and to barbarians, both to the wise and to the foolish." The gospel belongs to all mankind; those who have it are by that fact constituted debtors to all who have it not. Paul felt a peculiar call and obligation to Greek and barbarians. Christ sent him to the Gentiles.

On every Christian this debtorship rests until every man has been given the gospel.

Last Of It Used Several drummers were seated in the smoking compartment of the train. They were bemoaning the generally demoralized conditions of business, as they found it. Finally they turned to the quiet little man in the corner. "And how do you find things, brother?" "Never better since I've been on the road." "For the love of Pete and what's your line may we ask?" "Selling red ink."

Distant ancestors of the horse, that lived in early geologic times, were no bigger than small dogs.

More than 100,000 timepieces were imported into British Malaya last year.

Cannibals In Australia

Black Men Of North Western Section Eat Human Flesh

Cannibalism still is rife among the nomadic black men of north-western Australia, according to a report on the Culis and Culiaris tribes just issued by the Catholic Anthropological Conference.

The report is from the Rev. E. Alcaide, missionary among them since 1905.

"They are expert butchers," he says. "The heart goes to the strongest and is the first part of the body to be disposed of. Next the shoulders, arms and trunk are given to the men, while the legs go to the women. All this is systematically carried out. The flesh of the white man is looked upon as a dainty morsel."

"These aborigines are nomads without fixed home. They have neither house nor furniture and possess little beyond their spears, boomerangs, and battle axes which they always have at hand. They wear no clothing except when they come to the mission. As soon as they get out of sight all clothes are cast on the ground. They are the slaves of the men and, when necessary, are the beasts of burden. Murder is the greater arbiter of all disputes."

Egg Market Prospect

Many Producers Are Renewing Their Faith In The Egg Market

The current issue of the Egg and Poultry Market Review, published by the Department of Agriculture at Ottawa, after calling attention to the definite turn for the better which is now apparent in the egg market throughout the Dominion, makes the following observation with respect to the present situation: "Since early in the spring this publication has consistently pointed out the probabilities of the situation which appears now to be developing. The reduction in flocks, such as has taken place in many sections, was advised against. During recent weeks there has been an active demand for pullets, indicating that many producers are renewing faith in the egg market and are anxious to enlarge their flocks over the proportions planned for earlier in the spring."

Willfred Douchette Dies Of Fever He Added War Doctors To Master Willfred Douchette, who risked his life in the cause of medical science by permitting himself to be inoculated with trench fever germs in France during the World War, died a few weeks ago at New Haven, Conn., after lingering for years suffering from the fever. He lived for a year in a French hospital corner, segregated from companions and returned after the armistice broken in health. He had been a hopeless invalid ever since then.

Mr. Douchette resided with a brother, although he had been in hospitals most of the time since the war. He was buried with military honors.

A Television Broadcast

Moving Picture Shown In Department Store At Montreal

A small gathering at Montreal said what was probably the first broadcast of a moving picture by television in Canada. The picture was sent out on the fourth floor of a local department store and presented on a receiving set on the fifth floor. Through an instrument that looked like a phonograph horn with a small mouth, behind which was a large revolving perforated disc and a special neon tube, a glimpse was caught of a tiny silhouette moving picture in black and white relating the adventures of "Fat Fanny Falling Past and Furious."

He—"Oh, you mustn't blame me for my ancestors."

She—"I don't. I blame them for you."

Chemists have developed five methods of making artificial silk.

Polite Hobo: "Your little dawg 'as bit me, lady." Lady: "Where?" Hobo: "I really couldn't tell yer where, ma'am." Lady: "Nonsense. He couldn't reach that height!"—The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

John Tamar, who served as a farm hand on a farm near Debrecin, Hungary, for 101 years, died at the age of 112.

Thomas A. Edison, noted scientist, is on his way to complete recovery from his recent illness. Dr. Hubert S. Howe, his physician has announced. Estimated cost of providing relief work to Vancouver's unemployed men with dependents, of which the city must bear an undetermined portion, will be about \$450,000 a month. Excavations on the site of the new Royal Bank of Canada in London, England, have resulted in the discovery of an 1,800-year-old jigsaw puzzle in a Roman pavement.

In the two weeks from August 1 to August 15, 114,000 workers lost their jobs in Germany, bringing the country's total of unemployed to 4,104,000.

Approximately 10,000 head of cattle have been shipped from Canada to the United Kingdom so far this season, according to information in the office of the Hon. Robert Weir, Minister of Agriculture.

Total grain shipments from Vancouver for the crop year ending July 31 were 73,154,052 bushels, an increase of 25,480,745 bushels over the figure of 47,673,308 bushels shipped in the previous crop year.

During the months of May, June and July, the fog horn was sounded a few minutes over 772 hours, a period, had it been continuous, of over thirty full days, stating the keeper of the Yarmouth light and fog alarm at Cape Forchu, Nova Scotia.

A reduction of two per cent. in the Canadian birth rate in the first seven months of the year is shown by a preliminary report of the Dominion Bureau of Statistics. The total to the end of July was 50,851 births, as compared with 52,057 in the corresponding period of last year.

Prosperity Plan

Five Year Moratorium On War Debts Is Proposed

A five-year world prosperity plan was outlined to delegates from 20 countries attending the world social-economic congress at Amsterdam, by Dr. Louis L. Lorwin, of the Brookings Institution, Washington, D.C. He told 300 economists, industrialists, labor leaders and government officers that a general five-year moratorium on all war debts and reparations payments was the first necessary step to give the world a breathing spell from what he termed its most aggravating and dangerous post-war problem.

News Fails To Break

An editor apologized to his readers after this fashion: "We expected a marriage and a death to publish this week, but a violent storm prevented the wedding, and the doctor having taken sick the patient recovered and we are accordingly cheated out of both."

"Do you belong to the town?" "No." "Then we're neighbours. I don't come from it either."—Lustige Kolner Zeitung, Cologne.

Making Long Trip

Small Bear Taken From B.C. To London Zoo

Screaming defiance to the world and, unknown to him, bidding a last good-bye to the timbered slopes of his beloved mountains, a three months old grizzly cub, off-spring of some mighty monarch of the Canadian Rockies, left Jasper Park Lodge by Canadian National Express, en route to England and the confines of an English zoo. The bear cub was captured last spring by Angus D. Vickers, son of the president of Vickers, Limited, famous British armament firm, who shot the mother grizzly while on a hunting trip. Mr. Vickers left the cub in charge of George Hargrave, his guide, at Jackman, B.C., and only recently ordered the bear shipped to him in London, England.

CHILD'S BLOOMER DRESS

Slashed from neck at center-front, slashed edges bound and finished for closing at ends of attached collar. Front and back of dress are gathered to a yoke. Long set-in sleeves gathered into wristbands and finished with turned-back cuffs, perforated for short sleeves with cuffs. Lower parts of bloomers gathered into kneebands. Elastic is inserted through a hem at top of bloomers. Ten pieces.

Proportional Measurements

Years 2 4 6
Bust 21 23 24 ins.
Sleeve to shoulder 10 11 12
(with shoes) 28 32 36 ins.
Before cutting, compare carefully all pieces of pattern with chart.

CHAUTER XXVIII.—Continued

"Yes, I know you. You have come before, but—well you always go just when I think you're real—just as he has gone. He went down in a dreadful storm—my Nick! There are sharks in those waters, and—other awful things. I've seen him fighting them—struggling—his hair all wet and matted. I—"

Fear was in her eyes now, fear for her best beloved. She trembled, and her voice rose higher. Desperate, Nick bent to her, speaking with slow distinctness.

"Listen, my precious little wife. I am Nick. I was not drowned. I did not fight those terrible things that haunt you. They are only a dream, but I am not a dream; could a dream hold your hands like this, Gay—and kiss them—like this? Look into my eyes. Can't you believe me, my darling?"

She drew her hands away, putting them to her head as if confused again. "I—I believed before—and you went away."

Nick was breathing hard, as if at the end of a long race. Oh, if he could fight with his bare hands! He thought savagely. But to battle with something intangible—to conquer something unseen. . . . His jaw set grimly. He would conquer it! He would find a way to set Gay's tortured spirit free—to bring back the would be eyes. Perhaps if he began at the beginning—if he kept calm and steady, and took her back to their first days together—if he recalled to her poor, sick mind the vows he had spoken, wouldn't she understand? Wouldn't she know him?

He said, taking her hands in his: "Gay, you are breaking my heart. You think me a myth—an hallucination—a part of those dreadful nightmares, when all the time I am really Nick, come home after a long journey. But I shall make you believe me. Will you believe I am? I tell you something that nobody in the whole world knows but just ourselves? I'll tell you where we were married, darling. It wasn't where everyone thinks it was, you know, in the office of that little of the Peace, with you looking every minute at Abraham Lincoln when you ought to have looked at Me! The stars were shining when we were married, Gay, and somewhere not far away a hermit thrush was singing his evening song. We called it our bridal chorus—don't you remember? You were looking straight into my eyes, sweetheart, and I said: 'God's a good enough witness for me, Gay; and I promise you now that

I'll love you—and honour you—and be true to you. . . ."

Slowly, steadily, surely, the shadow was lifting from Gay's eyes. Watching, Nick scarcely breathed. As the distress and fear gave way, her face took on a new and magical beauty. It was like the slow, exquisite opening of a flower. She smiled; stretched out her arms; and cried, her voice echoing out gladly in that silent house: "Nick! dear Nick! is it really you? Oh, if you love me, stay with me. Stay with me. Don't leave me. . . ."

She was in his arms.

"Never again," Nick promised as he held her close. "Never, never again."

In the room below, Julie Nipps paused in the polishing of a candlestick, and with a wild sob threw herself on James Maxwell's breast: while, crouched on the stairs, where he had been listening tensely, for those welcome words, an old man raised eyes that were blurred with tears.

"Oh, God—our Heavenly Father," he said brokenly, "We thank thee."

He arose, gasping, as if he could not breathe, and stepping into the air, looked up in rapture at the limitless blue above.

CHAPTER XXIX.

There followed days when Nick never left Gay's room save while she slept. If she awakened to find him gone her eyes would widen pitifully with fear that his return was but a dream. After the first glad outburst of joy, she was alarmingly weak; but the days passed and her strained nerves relaxed, the serenity that was the keynote of her character came back again.

Nick never forgot those days when he lived in dread of a relapse. But it did not come. Slowly, to be sure, but with encouraging steadiness, she returned from that dead "no man's land" where she had wandered; yet, unless he were at her side, it was days before she could remember the fact that her husband was really safe. "I know I'm foolish," she said apologetically, "but your being here is so wonderful that I want to keep you a prisoner every minute."

"Keep me," Nick answered. "It's a case where the prisoner hugs his chains."

These the first, anxious week, those were happy days. Sometimes the little boys would steal in quietly, and climbing onto their father's neck, listen to his stories of the strange and beautiful islands he had seen. Of the storm, and the time that followed, Nick never spoke. He would not speak. He dreams of the horror had been too vivid. Sometime, perhaps, he would tell her, but not now. Nothing but joy must touch her for the present.

It was three weeks before Halliday returned, and he came alone. Nick never spoke of his passing, but the boys following him and Angela in the hours following her outburst. She did not appear again before Nick left the boat; and her husband's explanation of a sick-headache was accepted with polite credence on the part of the Nipps. It was only when he saw the Colonel's suggestively lifted eyebrows, that for James Halliday, he seemed almost pathetically glad to be back in Bakerville; and small Martha was seldom absent from his side. It was on a Sunday morning that Sonny Nipps, looking at his father, was instructing the little girl in the art of wedding a flower bed that was "all her own."

The boy watched quietly for a moment, and then announced in a tone of pride: "My baby sister's got a name. Her name's Nancy, same as Uncle Sim's field, New York. What you think of that?"

"That's fine," said Halliday. He took a seat on the edge of Selma Smith's old rocker, and smiled at the little boy in his miniature overalls. "What does Uncle Sim say?" he questioned.

"He's come," said Uncle Sim now. He said he was "fabergasted." I guess he meant 'spruced.' He acted that way. Was you spruced, Uncle Sim?"

"Now what would I be surprised at?" asked Simeon, adjusting his umbrella so that it sheltered little Martha's head.

"I mean about my baby sister having the same name as your old woman. You acted spruced."

"Well, and I was!" Simeon turned to Halliday, his face as beaming as a Jack-o'-lantern. "You could have knocked me down with a feather, and no mistake. Always thought if I had a girl of my own I'd call her Nancy, but the good Lord never see fit to send us one, nor a boy neither. Seems like I love that little critter just like she belonged to me. When they told me they'd named her for my old woman I felt like my cup was runnin' over."

"Did it spill onto your bib, Uncle Sim?" asked little Martha sympathetically.

Halliday smiled, and Simeon grinned broadly.

"Seems like it did, honey. It spilled all over me in a nice, warm, comfortable flood."

"Our shower bath can do that," said Martha. She arose, and leaned lovingly against Halliday's knee. "I wish we had a Nancy," she said quietly.

Halliday stroked her hair. (To Be Continued.)

Not An Unknown Country

Contours of Sea Floor Are Familiar To Geologists

Below the surface of the great oceans there lies more land by far, than is comprised in the area of all the continents. It is not altogether an unknown country. The sea bottom is constantly studied and its general contours are familiar to geologists. It is known, for example, that the Atlantic Ocean lies above an immense plain, surrounded by an incline that rises very slightly for some hundreds of miles to the continental shores. In a few places are mountains under the sea, tops of which are lonely islands. And here and there are extraordinary depressions, deeper by a mile or more than the general ocean bottom.

One of these lies between Cuba and Honduras, and is called the Bartlett Deep. Not much is known of it except that it is two miles deeper than the ocean floor and is like a giant's crack, a thousand miles long and about fifty wide. It is suspected to be of volcanic origin, and it is thought that seismic disturbances may still begin in its dark depths, four miles below the surface, of the Caribbean Sea. This is a problem of importance for an uneasy and unreliable fact in this location may make it inadvisable to pursue any further the project of a Nicaragua Canal. There are some geologists who think it possible that an earthquake in the Caribbean might drain the water from the lakes which are to be linked to form the canal.

The navy proposes to find out as much as possible about conditions and contours in this submarine trench by an exhaustive hydrographic survey. Curiosity concerning the sea bottom might be enough to account for this undertaking, but it has a more practical occasion in the necessity for exact knowledge concerning earthquakes and their effect on the affairs of commerce.

Important Decision Of King's Bench Judges

Rule That Man Is Twenty-Three Until He Is Twenty-Four

When is a man 23 years of age? Five judges of the King's Bench Division, including the Lord Chief Justice, Lord Hewart, decided in a case that was being appealed in the Criminal Court of Appeal recently that a man is 23 until he is 24. The question arose over a section of the Criminal Law Amendment Act. Lord Hewart asked: "Does not a man cease to be 23 the moment he passes his 24th year?" Counsel for the appellant submitted that a man was of the age of 23 for a period of 365 days—in other words, he was 23 until the Lord Chief Justice announced that on the ground that there was ambiguity in the law the subject should have the benefit of the doubt, and the Court had decided to allow the appeal in behalf of the accused man.

Loudspeaker For Planes

Designed Especially For Use In Fighting Forest Fires

A newly-developed loudspeaker for airplanes, designed especially for use in the fighting of forest fires, has been tried out successfully at Roosevelt field, New York. The loudspeaker, which weighs 100 pounds, was tried in a Fokker plane piloted by N. C. Brown, who flew at a height of 1,200 to 1,500 feet, circling the field and talking. He was heard clearly over a radius of more than a mile. The speaker uses a wind generator and it will be adapted for use by police, the sponsors said.

Payment In Arrears

Prof. G. P. Lestrade, of Pretoria University, condemns the South African natives' practice of paying in cattle for wives on the instalment plan. "Nothing is more calculated to no man against the serenity of marital relations than the consciousness that there are still a few cows owing on the wife."

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Wallsend, England, to Wellington, N.Z.—The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the dock is being towed by the tug.

The ambition of King George V. of England to own the most complete collection of British postage stamps in the empire over which he rules has been realized.

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in the blood. He is himself a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Ronyth and the wonderful aquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army, and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Bodyguard for Scotland, and belongs to no fewer than ten clubs.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon plants, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

The plant which changed its nature at Cornell is the echinacea, the closest of the annuals. There are two species, Mexican, the annual, and perennial, the perennial.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the characteristics of a perennial. Then the annual portion dried up and disappeared, and the remaining stalk developed into a true perennial.

Trans-Canada Highway

Four Hundred Miles Of New Highway To Be Built Between Kenora and Heron Bay

The decision has been made by the Ontario Government that the trans-Canada Highway will run through the Ottawa Valley to North Bay and will go east from Kenora to Heron Bay. With regard to the latter stretch, it has not been decided whether the highway will be routed by Cochrane or Sudbury. In the stretch between Renfrew county and North Bay, there will be a partial route, including a stretch of 100 miles. In the western section, between Kenora and Heron Bay, 400 miles of new highway will be built.

Nearly all children are subject to worms, and many are born with them. Spores them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Brandon Industrial Survey

Facts Collected Will Be Published In Booklet Form

Brandon's most comprehensive industrial survey recently completed by Prof. Burton Hurd of the Manitoba College, for the use of the Brandon section of the Industrial Development Board of Manitoba will be partially published in booklet form. Facts concerning the city, not previously available, have been gathered in an interesting manner, and should be of special interest to industrial firms contemplating a site in the West.

Poland expects to receive \$2,000,000 from its state lottery this year.

"One should prepare for old age as one prepares for a long journey."

for BITES

Insect, snake, or animal bites. Minard's Liniment is the only one that draws out the poison!

MINARD'S LINIMENT
"KING OF PAIN"

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestone which possesses certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicate that several deposits of impure limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock, in a small stream from the base of the furnace, is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules tumble through the air each develops a very thin, pliable glassy skin behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

THE RHYMING OPTIMIST

By Aline Michaels

THE GLEAN ALONE

The friends whom I most love
Are like the stars to me,
As those far bodies move
Along immensity.

The stars are worlds, we know,
And worlds hold joy and pain,
Hold ecstasy and woe,
And purity and stain.

But of those worlds afar
We see the gleam alone;
The glory of the star
That on our path has shone.

And so in friends most dear
I see no fault, no blemish,
But only joyous bloom
And splendour of light!

Should Be Congratulated

Woman In California Keeps Employees Regardless Of Age

There is a very special and particular achievement for which Mrs. Mary K. Solari deserves congratulations, entirely aside from the fact that she has just completed her twenty-fifth successful year in the restaurant business in San Francisco. That is the stand that she has taken, as a business woman and as a human being, against the theory of "firing after forty," which has become so prevalent in the so-called middle-aged and industries throughout the United States.

Out of eighteen employees, four have been with her more than twenty years; five, over fifteen years; four, over ten years, which, in a staff of that size, is an extremely high percentage of long service.

Business women may justly feel proud that another business woman has taken up the cudgels so vigorously against this ruthless pushing aside of the so-called middle-aged without consideration of ability or intelligence.

A Good Investment

Comment has been made on the vast waste among beekeepers through the use of poor equipment. Well made hives with good frames of correct size are a good investment. Once combs are built they can be exchanged from hive to hive and used anywhere as needed. One is amazed to find the extent of the use of makeshift hives and frames.

New Source Of Revenue

Among the emergency bills sent to the Uruguayan congress and designed to help solve the financial crisis there is one requiring privately owned automobiles to pay from 20 cents to \$1 daily according to size for a permit to operate. Permits would be issued in the form of a large sticker with the day's date, pasted on the windshield.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food is not properly assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts. You get all these six salts in Kruschen's Salts, and each one of them has the action of its own. Together, they stimulate and tune up the body's functions from a number of different angles, the most effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action taken in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these vital juices which deal with partly digested food, cause it to be finally absorbed into the system.

So you see there is no mystery about Kruschen's Salts. It is a tonic, a scientific and well-known principle. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvii, 3.

Except your Father lead you, you cannot find the way. Among the snares and pitfalls, The lures that lead astray; Except you be like children, And leave the skirts of love, You'll miss the narrow pathway That leads from earth above.

Blessed are ye if ye become as little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth; the blessing is the truth itself. He who sees the essential in the child—the pure childhood—sees the essential in the adult. In a word, real childlikeness.—George MacDonald.

Diets respond quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Winnipeg Firms

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for about 40,000 tons of coal for its central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Crude Oil Satisfactory

Upward of 200 barrels of crude oil per day are now being taken from the Bitumens wells for the use of the Canadian Pacific Railway in their locomotives on the mountain division between Calgary and Field, B.C. The railway company is stated to have found the fuel from the Bitumens area in eastern Alberta highly satisfactory, and is likely to increase its acquisitions in the near future.

Expects Stork In July

"I Suffered such Pain"

MOTHER advised me to take the Vegetable Compound because I suffered such pain each month.

"It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound. My sister takes it too."

Mrs. Aubrey S. Smith, P. O. Box 104, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficulties. Won't you try it, too?

Lydia E. Pinkham's VEGETABLE COMPOUND

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extract, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extract, the one sure relief for corns. So-1 at every drug store, 35c.

Local News

Mrs. Sherring of Frank, was a visitor in town on Monday.

Jessie McMurdo of Pincher Creek has been spending the week with Mrs. R. Holmes.

The Caledonian Society held a social in the K. of P. hall last Friday evening.

"Going Wild" is the feature at the Palace theatre this week-end, starring Joe E. Brown.

Dr. McCallum of New Dayton was a visitor this week at the home of his daughter, Mrs. Lindoe.

Mr. and Mrs. Wm. Gate enjoyed a motor trip over the Banff-Windermere highway.

Rowland Hill, formerly of the Bank of Commerce staff here, now of Calgary, was a visitor last week.

Mrs. M. Booth and son of Vancouver, were the guests of Mrs. Kilgannon last week.

Mr. and Mrs. Ed. Ledieu made a trip to Sylvan lake this week, Mrs. Ledieu's sister returning with them to her home at Nordegg.

Fred Guerard and Everett Prier made the round trip from Coleman to Banff, Lake Louise, Calgary and other points.

Mr. and Mrs. Jas. Thompson, formerly of Fernie, were visitors with Mr. and Mrs. A. Beveridge during the week.

Mr. and Mrs. J. Houghton spent a week with relatives in Calgary, and attended the Highland festival at Banff.

Mr. and Mrs. W. Hoggan recently spent a week visiting the latter's parents at Arrow Lakes, B. C.

Long Kan and Long Lock of the Coleman Cafe sent a card to The Journal from Hong Kong, stating they arrived there on Aug. 7. They plan on spending about a year in China.

Victoria Rebekah Lodge will hold an anniversary whist drive and dance in the Oddfellows hall on Saturday, Sept. 12, commencing at 8 p. m. Admission is 50c, and everybody will be welcomed.

Mr. and Mrs. A. May of Medicine Hat were visitors at Coleman and Bellevue over the week-end, and their son Gordon spent a day or two with Earl Bowen. Their daughter Gertrude accompanied them.

Mr. and Mrs. W. E. Read have moved from Pincher to reside in their house in Coleman. Mr. Read was on the C.P.R. staff there, and some years ago was assistant agent here.

Mr. Melville Anderson, of Anderson & McLean, eight specialists of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Sept. 8th. 20 years experience and regular visits assures you of satisfaction in all optical work.

The reception of the radio service in St. Alban's church last Sunday was poor, as it appeared there was local interference in Calgary between the church and the radio station. The sermon was by the Bishop of London.

Ladies of Minerva Chapter, O. E. S., met at Mrs. Garner's home last Thursday in compliment to Mrs. Adam Walker, and presented her with a lodge emblem pin as a farewell gift prior to her departure for Vancouver on Saturday last, where with her husband she will reside. To wind up the evening, the ladies made a surprise visit to Mrs. Albert F. Short's home in Carbondale, and played whist. The prizes were won by Mrs. Thomas, Mrs. Walker and the consolation by Mrs. Rippon.

The much-harshed moving picture, "City Lights," at Bellevue next week Charlie Chaplin's latest.

Mr. and Mrs. Harry Olson and daughters, Marie and Virginia, left on Saturday to reside at Midnapore, ten miles south of Calgary. Mr. Olson has been foreman of track-laying crews for a considerable time, and will continue in this line of work with the C. P. R. They lived here for about eight years, and made many friends. Miss Eleanor Neilson accompanied them to Calgary.

"Buster," the big dog owned by John Watson, of Fan 98, is having a touch of city life and is the centre of admiration for the small boys. He came in with Mr. and Mrs. Watson on Saturday night, when Forest Ranger Boulton called at Fan 98 on his way from York Creek fire, and deemed it safer to bring them in than take the chance of leaving them. The parrot and the canary were included in the passenger list. Later the International truck went up and brought the furniture.

Newspaper Best Clerk

The manager of a well known Cardston store describes the local newspaper as "our best clerk." He explains that it sees more people, gets more of their individual time, works longer hours, and tells its story with more accuracy than any other clerk they can employ. These papers are going into the homes of people, and are assured of their friendly attention. This is proved by the tremendous growth in importance of the press in the last few years, according to the manager who declares that today the local newspaper is the backbone of any constructive sales effort.—Cardston News.
